

Entry-Level Cloud Engineer

Company: Kamilimu Limited

Location: Nairobi, Kenya

Type: Full-time

About Us

Kamilimu Limited is committed to building scalable, secure, and innovative cloud solutions that power the next generation of digital products and services. We are seeking a motivated Entry-Level Cloud Engineer to join our team and grow into a key contributor to our cloud infrastructure and DevOps initiatives.

Key Responsibilities

- Assist in deploying, managing, and monitoring cloud infrastructure (AWS, Azure, or GCP).
- Support CI/CD pipelines and automation workflows using tools like GitHub Actions, Jenkins, or GitLab CI.
- Perform basic cloud networking configurations (VPC, subnets, security groups, load balancers).
- Monitor system performance, troubleshoot issues, and optimize cloud resources for cost and efficiency.
- Collaborate with developers to containerize applications using Docker and Kubernetes.
- Implement basic Infrastructure as Code (IaC) using Terraform or CloudFormation.
- Participate in security best practices, including IAM permissions, secrets management, and compliance.
- Document processes, deployments, and troubleshooting steps for internal knowledge sharing.

Requirements

- Bachelor's degree in computer science, Information Technology, Engineering, or related field (or equivalent practical experience).
- Familiarity with at least one cloud platform (AWS, Azure, or GCP).
- Basic understanding of Linux systems administration and shell scripting.
- Knowledge of version control systems (Git).
- Exposure to CI/CD concepts and DevOps practices.
- Strong problem-solving and troubleshooting skills.
- Ability to work collaboratively in a team and communicate effectively.

Preferred Qualifications

- Internship or project experience with cloud deployment or DevOps tools.

- Familiarity with containerization (Docker) and orchestration (Kubernetes).
- Exposure to Infrastructure as Code (Terraform, Ansible, or CloudFormation).
- Basic knowledge of cloud security principles.
- Understanding of monitoring tools (Prometheus, Grafana, CloudWatch, or equivalent).
- AWS Certified Cloud Practitioner or Azure Fundamentals certification.

What We Offer

- A supportive environment with mentorship and professional development opportunities.
- Hands-on experience with cutting-edge cloud technologies.
- Competitive entry-level salary and benefits package.
- Flexible work arrangements (remote/hybrid).
- Clear growth paths into Cloud Engineering, DevOps, and Site Reliability Engineering (SRE) roles.

How to Apply

Please submit your CV, a short cover letter, and links to any cloud-related projects, GitHub repositories, or certifications (if available).
